Benchmark reduced level = 49.872 m

Number of readings = 9

Sight value	Sight Type	RL
2.191	Backsight	49.872
2.507	Inter-sight	49.556
2.325	Inter-sight	49.738
1.496	Foresight	50.567
3.019	Backsight	50.567
2.513	Inter-sight	51.073
2.811	Foresight	50.775
1.752	Backsight	50.775
3.817	Foresight	48.710

NOTE:

1-   The previous Foresight and the next Backsight have the same reduced level
2-   The reduced level for the first backsight is the reduced level of the benchmark.

Arithmetic check: Sum of Rises - Sum of Falls must be equal to Last RL - First RL
